#2 Crushed Limestone

LOCAL AGGREGATES

#2 Crushed Limestone is a durable, angular stone primarily used for backfill and as a base for driveways, patios, and heavy-load-bearing surfaces. Its larger size, ranging from 1-1/2″ to 2-1/2″, allows for excellent drainage and stability, making it an essential material for foundational support in both residential and commercial projects.

Delivery Options:
Bulk via Single Axle Dump Truck, Tri-Axle Dump Truck, or Quad-Axle Dump Truck.

Super-Sacked and palletized via Straight Truck with Moffett or Semi-Truck
